Technical requirements at events / conferences

I've found that people tend to ask me the same questions every time I get invited to speak somewhere. So here is a list of a few requirements, which will help streamline the process.

- I will always need access to a large projection screen and a bright projector capable of projecting in full HD (1920 x 1080)
- I prefer to run presentations from my own laptop. An HDMI connecting cable should be available, if not, I can bring one (please let me know)
- If a separate monitor is not available, the laptop running the presentation should be nearby on a table where it can be seen from my position on stage

On Stage Requirements

- If presenting on stage, a lavalier or headset mic will be required
- A small table for props
- A bottle of cold water (preferably sparkling)

If you are unable to provide the above setup, please confirm with me as soon as possible so that alternative arrangements can be made in good time.
